

Application form – Industry Association

“An Industry Association member shall be a national or supra-national association representing robot manufacturers or integrators in the respective geographical area. It must have independent financial resources and must support industrial, technical and scientific activities in the field of robotics.

From each geographical area only one association can be an Industry Association member. If, before an applicant from one geographical area has been accepted as a member by the Executive Board, there are additional applicants for membership from the same geographical area, the Executive Board with a vote of three-quarters of its members present shall decide about admission of the additional applicant to membership.”
